PROJECTS

British Telecommunications(BT)

Working on MySQL, java.

Working with BT LLUMS project , a web based database application for tracking and reporting various activities carried out by Openreach- BT.

It's a reporting system which depends on other systems within BT like NGWFMT, PHEONIX and others, therefore it's always kept up to date with the number of cards installed in each cabinet.

It gets data from other components under BT and reporting back to users and deals with billing.

Involved in major migration processes, developing pages, migration scripts.

Involved in continuous enhancements and fixing production issues.

ADDITIONAL INFORMATION

Date of birth : 07-May-1996
Hobbies: web surfing, cooking, Badminton
